DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

Specification, page 1, just prior to Background of the Invention, the following should be inserted:

-- CROSS REFERENCE TO RELATED APPLICATION

This application is a divisional application of U.S. patent application serial No. 10/602,686, filed on June 25, 2003, entitled PRODUCTION PROCESS OF GAS TURBINE, Now U.S. Patent No. 6,865,893. - -

Appropriate correction is required.

Drawings

2. Figures 2, 3, 4, 5, and any other figures that are not part of Applicant's invention should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3726

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 7 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim is drawn to an abstract idea because the claim merely recites "designing" steps.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Walker et al. (US 5,520,512).

Walker et al. teach a process of making a gas turbine, comprising a compressor (12, Fig. 2) for compressing atmospheric air and generating compressed air, a combustor (18, Fig. 2) for mixing and combusting the compressed air and fuel and generating combustion gas, and a turbine (20, Fig. 2) driven with the combustion gas, said gas turbine being constructed of a plurality of design elements necessary in designing said compressor, said combustor and said turbine, the process comprising the steps of: designing common elements (compressor 12, combustor 18, turbines 20 and 30), which

Application/Control Number: 10/765,866

Art Unit: 3726

are used in common in various power generation cycles (simple cycle, col. 5, line 8 and combined cycle, col. 5, line 31), from among the design elements of said gas turbine; and designing said gas turbine such that the common elements are adapted for a power generation cycle of the gas turbine to be produced.

Note that the above gas turbine has been designed prior to being put together.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarang Afzali whose telephone number is 571-272-8412. The examiner can normally be reached on 7:00-3:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bryant can be reached on 571-272-4526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a
